What: This TRAVLite flashlight is powered by 3 AAA size batteries and uses an ultra shock resistant TPE (Thermoplastic Elastomer) casing. A high lumens beam and durable LED chip ensures outstanding, reliable performance. It is the ideal choice for both traveling and domestic activities. TRAVLite flashlights are specially designed to work well in demanding situations, such as when camping or in outdoors environments.

**Camelion 2009 lab tests, using 3 Camelion alkaline AAA batteries; LED brightness will attenuate when battery power is weak.
**An IPX6 designation means it will hold up against rain and jets of water, but is not suitable for swimming or guaranteed to survive immersion in water
